

Industrial Fan Unit Manual

Document ID: manual_fan

1. Overview

Industrial Fan Unit Manual. Rated for continuous packaging-line duty. Follow lockout/tagout before any intrusive maintenance.

2. Safety

Isolate energy sources. Wear hearing protection near rotating equipment. Do not bypass interlocks during production.

3. Fault E-310

Fault code E-310: Bearing acceleration peak. Troubleshooting: Replace DE bearing; check alignment. Related spare parts: 6208-2RS bearing, Fan pedestal bolt M16, VFD filter kit.

3. Fault E-312

Fault code E-312: Overcurrent on VFD. Troubleshooting: Inspect blade fouling and inlet screen.
Related spare parts: 6208-2RS bearing, Fan pedestal bolt M16, VFD filter kit.

3. Fault E-315

Fault code E-315: Imbalance alarm. Troubleshooting: Clean blades; rebalance to ISO G6.3. Related spare parts: 6208-2RS bearing, Fan pedestal bolt M16, VFD filter kit.

4. Preventive maintenance

Daily: listen for abnormal noise. Weekly: vibration spot check. Monthly: inspect fasteners, lubrication, and seals.

Troubleshooting table

Code	Description	Action
E-310	Bearing acceleration peak	Replace DE bearing; check alignment

E-312	Overcurrent on VFD	Inspect blade fouling and inlet screen
E-315	Imbalance alarm	Clean blades; rebalance to ISO G6.3
