

Centrifugal Pump Unit Manual

Document ID: manual_pump

1. Overview

Centrifugal Pump Unit Manual. Rated for continuous packaging-line duty. Follow lockout/tagout before any intrusive maintenance.

2. Safety

Isolate energy sources. Wear hearing protection near rotating equipment. Do not bypass interlocks during production.

3. Fault E-220

Fault code E-220: Pump vibration RMS above limit. Troubleshooting: Check NPSH, impeller, coupling. Related spare parts: Impeller A-145, Coupling spider CX-40, Grease NLGI-2 EP.

3. Fault E-AUDIO

Fault code E-AUDIO: Abnormal acoustic signature. Troubleshooting: Inspect cavitation and bearing grease. Related spare parts: Impeller A-145, Coupling spider CX-40, Grease NLGI-2 EP.

3. Fault E-225

Fault code E-225: Seal flush failure. Troubleshooting: Restore flush flow; replace mechanical seal.
Related spare parts: Impeller A-145, Coupling spider CX-40, Grease NLGI-2 EP.

4. Preventive maintenance

Daily: listen for abnormal noise. Weekly: vibration spot check. Monthly: inspect fasteners, lubrication, and seals.

Troubleshooting table

Code	Description	Action
E-220	Pump vibration RMS above limit	Check NPSH, impeller, coupling

E-AUDIO	Abnormal acoustic signature	Inspect cavitation and bearing grease
E-225	Seal flush failure	Restore flush flow; replace mechanical seal
